SME's highly qualified, certified inspectors are knowledgeable with the MDOT MQAP Manual and are already performing inspections in many of the local fabrication shops in the Midwest. Our team can save you time and money by sharing resources with our other inspection projects, then prepare the comprehensive final document package with everything from inspection reports to Buy America documentation.

STEEL FABRICATION SHOPS

Our skilled CWI and NDT certified specialists oversee the steel fabrication process from start to finish, including verification of welds and slip critical connections, and steel traceability. Additionally, SME's in-house laboratories can perform testing on hardware, bolts and other materials.
